

Florian BOBO

Senior Machine Learning Engineer (Production & MLOps)

📍 Pérols, France (open to remote) • 📞 [+33607238689](tel:+33607238689) •
✉ florian.bobo34@gmail.com • 🔗 <https://linkedin.com/in/fb66>

Summary

Senior AI & MLOps Engineer with a strong background in applied mathematics. I specialize in the end-to-end industrialization of predictive models, managing critical Kubernetes infrastructures, and optimizing high-performance code.

Skills

Python

cython, scikit-learn, pytorch, tensorflow, hugging-face, fastAPI

ML & AI

domain

Deep Learning, Predictive Modeling, Clustering, Reinforcement Learning., AI, LLM, Generative AI, Data wrangling, RAG, fine-tuning, Bayesian statistics

MLOps & DevOps

Kubernetes (Cluster Management), Docker, MLflow, Git., Gitlab, Gitlab-runner, Kestra, Concourse CI/CD, ARGOD, Openshift, Ansible

Monitoring

Prometheus, ELK Stack, Grafana, run:ai, Dynatrace

Cloud

AWS, EC2, Bedrock, On premise Cloud infrastructure (build & maintenance)

System Programming

C, golang, rust

Soft Skills

Agile/Scrum, Technical Writing, Complex Problem Solving, Autonomy, pedagogy, technological watch

Experience

Crédit Agricole Group Infrastructure Platform (CA-GIP)

Jan 2023 - Present
Montpellier, France

AI & MLOps Engineer (Tech Lead)

🔗 [CA-GIP](#)

- End-to-End A.I. Production & Infrastructure
- Incident Management & Reliability
- Expert Advisory & Client Support on Generative-AI
- Deployment of a production platform for GPU mutualisation and orchestration

DSI - France Travail

Aug 2020 - Jan 2023
Montpellier, France

Data Scientist & MLOps Engineer

- CI/CD Automation for AI workloads
- Production Deployment of ML jobs based on NLP.
- AIOps (Predictive Maintenance)
- Developed mathematical models to forecast energy usage patterns within a data center.

AXENS

Sept 2019 - Aug 2020
Salindres, France

Junior Data Scientist

🔗 <https://www.axens.net/>

- Industrial Process Optimization
- Digitalization of the plant via process simulation and data analysis

French Ministry of Education

2016-2019

Mathematics Teacher

- Taught Mathematics to High School and Bachelor students. Developed strong pedagogical skills, enabling clear communication of complex technical concepts to non-technical stakeholders.

Certifications

Kubernetes - Cluster Administration
CA-GIP

Cyber-Security Awareness
CA-GIP
2025

Awards

Marathon du Web
Winner
2020

Hackathon Energia Tech
Jury's choice
2021

Hackathon ActinSpace
Finalist
2021

Publications

Academic Research Contribution
HAL Open Science
2022

- Contribution to research on phonetic characteristics in language learning. (See pages 209-210 & 216-230).

Projects

Design and deployment of a multi-tenant GPU-as-a-Service (GPUaaS) platform
Professional Project for CA-GIP

Built and maintained a complete Kubernetes ecosystem for Nvidia Run:AI, handling everything from OS hardening and network configuration to operator lifecycle management and feature enhancements.

AutoDevOps Framework
Inner-Source
2023
Developed a Python-based to automate the complete DevOps lifecycle for internal data projects.

Neural Net from Scratch
Educational Project
2021
🔗 [Neural Net From Scratch](#)
Educational repository to explain the concepts of Deep Learning with interactive visualization and deep insights from code.
From the concept of a single perceptron to a Deep Neural Network.

Education

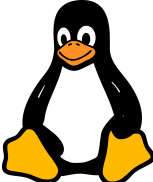

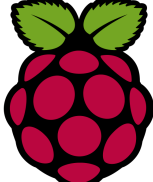

University Montpellier 3
Mathematics & Computer Science
2019-2021
Master's Degree
🔗 [MIASHS](#)

University Perpignan Via Domitia
Education
2014-2015
Master's degree preparation

University Perpignan Via Domitia
Mathematics & Computer Science
2011-2014
Bachelor's Degree

Higher school preparatory classes of Arago school
Engineering
2010-2011

Interest

Tabletop RPG	Indie Game	Favorite books	Tech Tinkering	Musical Composition
Shadowrun 5th edition		Discworld - Terry Pratchett		Piano
BloodLust		Musashi - Eiji Yoshikawa		Guitar
INS/MV		Tales of the Otori - Lian Hearn		Drums
WH40K: Dark Heresy
